

**AMENDMENTS TO THE CLAIMS:**

The following listing of claims replaces all prior versions, and listings, of claims in the application. If any claims are designated "cancelled," please cancel such claims without prejudice.

**Listing of Claims:**

1.-44. (cancelled)

1                   45.   (currently amended)       A method for killing and ~~inhibiting~~  
2 dermatophytic fungi and bacteria responsible for skin infection and non-pathological  
3 body malodor comprising the step ~~steps of preparing an aqueous solution containing a~~  
4 ~~therapeutically effective amount of an anticholinergic quaternary amine compound and~~  
5 of administering said solution a composition containing a therapeutically effective  
6 amount of an anticholinergic quaternary amine compound to the skin surface of a  
7 human body ~~so as~~ wherein the therapeutically effective amount alone is able to kill and  
8 ~~inhibit~~ fungi and bacteria on the skin surface.

1                   46.   (original)       The method according to claim 45, further comprising  
2 administration of the anticholinergic quaternary amine (ACQA) compound as a  
3 formulation in conjunction with an excipient, base or support material, wherein the  
4 concentration of the anticholinergic quaternary amine compound in the formulation is in  
5 an amount of from about 0.0001% to about 20% w/w.

1                   47.   (original)       The method according to claim 46, wherein the  
2 concentration of the anticholinergic quaternary amine compound in the formulation is in  
3 an amount of from about 0.001% to about 10% w/w.

1                   48.   (original)   The method according to claim 47, wherein the  
2 concentration of the anticholinergic quaternary amine compound in the formulation is in  
3 an amount of from about 0.05% to about 5% w/w.

1                   49.   (original)   The method according to claim 46, wherein the  
2 anticholinergic quaternary amine compound comprises glycopyrrolate.
